
General Information:

MicroChop contains a blend of specifically selected microbes to break down dead plant residues including lignin and cellulose. MicroChop is designed to enhance residue processing and provide additional beneficial nutrition.

Safety - MicroChop contains only non-genetically modified and naturally occurring microbes. It is non-toxic to plants and animals. Keep out of reach of children.

Mixing - MicroChop can be used in conjunction with most fertilizers and herbicides. Mix MicroChop as close to time of application as possible. Always perform a jar test to ensure tank mixing. Deposition adjuvants may enhance results.

MICROCHOP

Microbial Soil Residue Digester
MicroChop is a unique blend of beneficial soil microbes and natural ingredients designed to process crop residue and field debris into plant available nutrients.

275 GAL (1040.99 L) 2,338Lbs
2.5 GAL (9.46L) 21.25 Lbs
1 GAL(3.79 L) 8.5Lbs

Net Contents: -----

USAGE:

**BROADCAST: APPLY BY
AIR OR GROUND AT
32- 64 OZ / ACRE IN THE
FALL OR SPRING**

INGREDIENTS:

**OVER A DOZEN LIVE
BENEFICIAL SOIL
MICROBES AT 5 BILLION
CFU/ML, MICROBIAL
SUPPORT INGREDIENTS,
ACTIVATED WATER**

STORAGE:

**FOR IDEAL RESULTS
STORE IN A COOL,
DRY ENVIRONMENT
AND OUT OF DIRECT
SUNLIGHT. DO NOT
FREEZE.**
